TITLE: Bulky non woven fabric **abrasive** -
contg. synthetic fibres coated with mixed rubbery
elastomer-hard resin binder contg. **abrasive** particles

PATENT-ASSIGNEE: HIROYUKI K [HIROI]

PRIORITY-DATA: 1967JP-0085033 (December 29, 1967)

ABSTRACTED-PUB-NO: JP 79007996B

BASIC-ABSTRACT:

Bulky nonwoven fabric of synthetic resin fibre is fabricated by bonding crossing points of the fibres to each other with a resin binder. The fibre surfaces of the fabric are coated with a mixed binder consisting of a rubbery elastomer and a hard resin and contg. abrasives to fabricate bulky nonwoven fabric abrasive having an apparent density of 0.05-0.1 g/cm³.

In the mixed binder, the hard resin and the rubbery elastomer are mixed in the

ratio 50:50 is approx. 70:30. The amt. of abrasive is 100-400 pts. wt. per 100 pts. wt. of the mixed binder. The amt. of solid component in the mixed binder is 100-600 wt.% w.r.t. the wt. of the fibre.

Pref. the nonwoven fabric consists of nylon fibre of Tetron (RTM) fibre. The resin binder consists of acrylic ester, acrylonitrilebutadiene or methyl methacrylate-butadiene. The abrasives have grain sizes of 80-1000 mesh.
